camryx

AI FOR YOUR CCTV

Every camera, answered.

Ask your CCTV what happened and get the clip as proof. Camryx works with the cameras and the recorder you already have.

“Who took the box from the counter yesterday?”

No new cameras
Works with the CCTV, DVR or NVR you have now.

Ask in your words
English, Hindi or Hinglish. Type or send a voice note.

Proof, not guesses
Every answer comes with the clip and the time.

THE PROBLEM

Something went missing. Now you have to watch hours of recordings.

Don't watch. Just ask.

And to catch it next time, someone has to sit and watch the live cameras all day. Camryx does both jobs. It finds the moment in the recording, and it watches for the things you tell it to.

HOW IT WORKS

Plug in. Ask. Get the clip.

No new cameras and no new recorder. Camryx sits between the cameras you have and the phone in your pocket.

1. Your cameras

The CCTV, DVR or NVR you already have. Wi-Fi cameras, webcams and phone cameras work too.

2. Camryx site agent

A small app on a PC at your site. It finds your cameras and connects out over HTTPS. No port forwarding to set up.

3. Camryx checks

It searches the real events first. Then the vision AI checks the frames before it answers.

4. You get the answer

Ask from the web app, WhatsApp or Telegram. The answer comes with the clip.

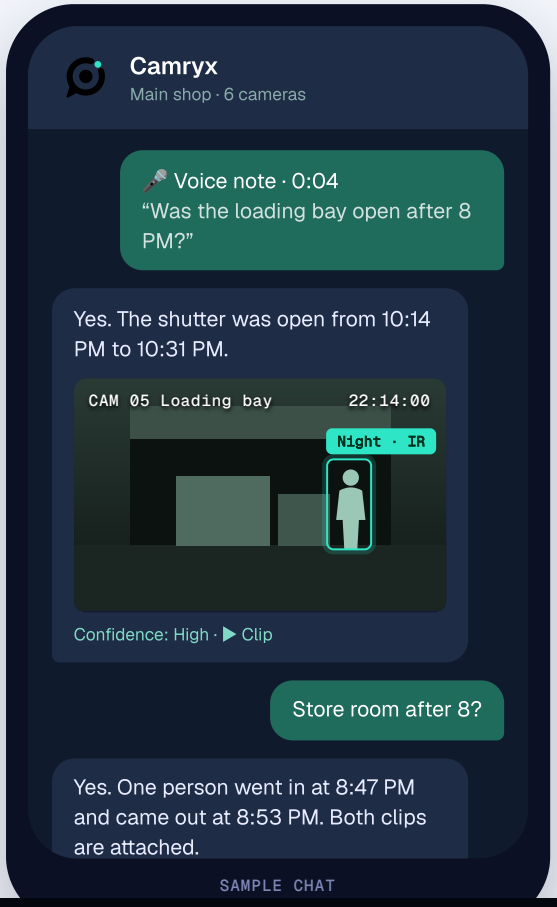

Ask it anything you would ask a guard

Camryx tells you which camera it looked at, what it found and how sure it is.

- What time did the shutter go up today?
- Was anyone in the store room after 8 PM?
- कल काउंटर से डिब्बा किसने उठाया?
- How long was the billing queue at 7 PM?

ASK FROM YOUR PHONE

Your cameras, right inside WhatsApp.

SAMPLE CHAT

Type the way you talk, or just send a voice note. Up to 3 clips come back in the chat. No new app to learn.

English, Hindi or Hinglish

Smart Search understands all three. Ask from the web app, WhatsApp or Telegram.

It shows you how sure it is

Each answer names the camera, the time and the confidence. If it cannot tell, it says “Not sure” instead of guessing.

Where did they go next?

Camryx follows a person across cameras by how they look, such as their clothes. No face recognition.

Find similar, or upload a video

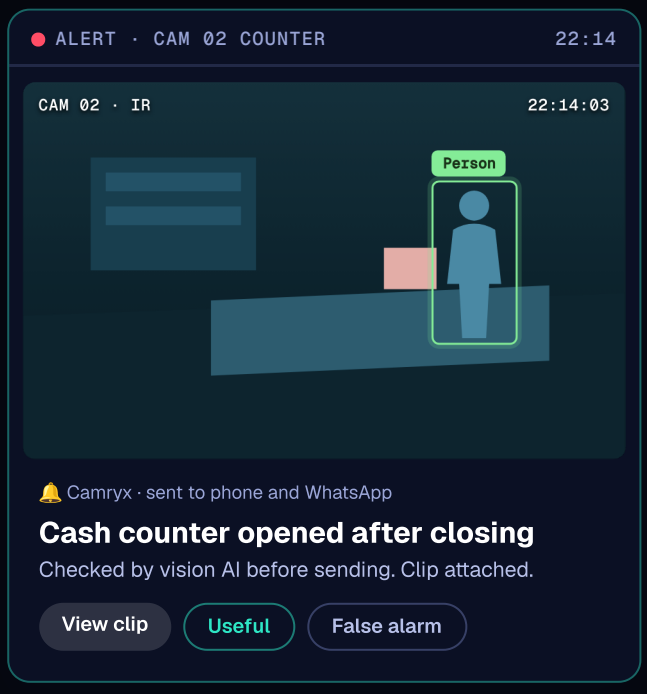

Found one clip? Camryx finds others that look like it. You can also drop in a phone video and ask about it.

SMART ALERTS

Set it once. Camryx watches.

Write the rule in your own words. Before an alert goes out, the vision AI looks at the frames again to check it really happened. Mark an alert “Useful” or “False alarm” and the rule gets better at your site.

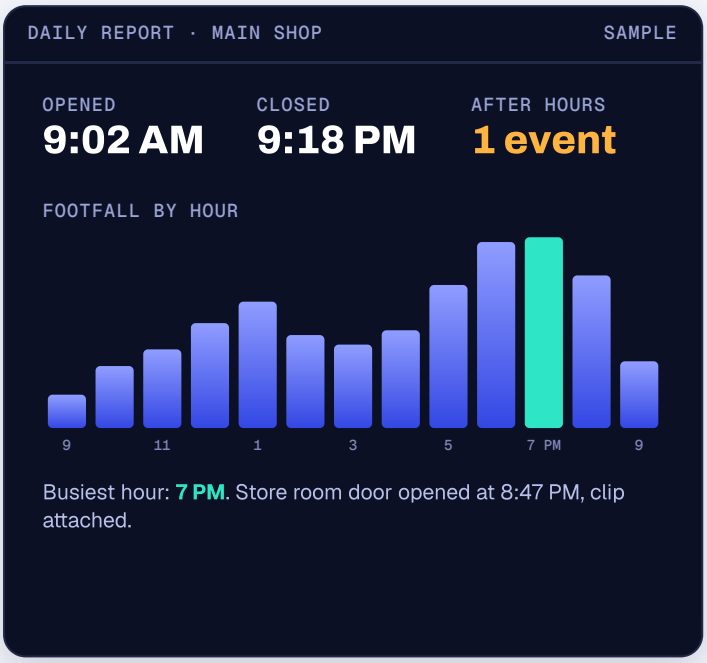

- “Alert me if there is smoke or fire.”
- “Tell me if the cash counter is left empty.”
- “Tell me if a camera is covered or moved.”
- “Tell me if someone hangs around the gate too long.”

DAILY REPORTS AND INSIGHTS

“What did I miss?”

Every morning Camryx sends a short report of yesterday: when the shop opened and closed, anything after hours, and how busy it was. By email, WhatsApp or Telegram, with a weekly PDF or CSV.

Insights from the same cameras

Footfall
People in and out, by hour and by day

Queues
How long the billing line is, and the wait

Vehicles
Cars and bikes in and out, parking slots, speeds

Dwell time
How long people stay in an area you draw

Heatmaps
Where people walk and stop in the shop

Opening times
When the shutter went up and came down

AFTER CLOSING TIME

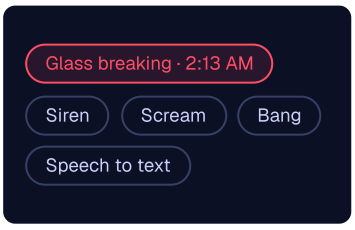

Day, night, and what the cameras hear.

Most trouble happens when no one is there. Camryx keeps working after closing, listens for sounds that matter, and packs the proof when you need it.

Works at night

It reads infrared footage and brightens dark frames before it looks. When it can't tell, it says “Not sure”.

Hears it too

A sound like glass breaking or a siren can start a clip, so you see what made it.

Proof you can hand over

For the police, insurance or your records. Each pack is sealed with a SHA-256 fingerprint so anyone can check nothing changed.

WORKS WITH WHAT YOU HAVE

No new cameras. No new recorder.

If your recorder can share a stream over RTSP or ONVIF, Camryx can use it. The site agent finds the cameras on your network for you.

Hikvision **Dahua** **CP Plus** **Tapo** **Reolink** **EZVIZ** **Uniview** **Axis** **Foscam** **Eufy** **Wyze** **IP Webcam**

Brand names belong to their owners and are listed only to show compatibility.

Video it can read

CCTV cameras · DVR / NVR · IP cameras · Wi-Fi cameras · Webcams · Phone cameras · Video files · RTSP / ONVIF · HLS links

Where answers and alerts reach you

WhatsApp · Telegram · SMS · Email · Phone notifications · Slack · Microsoft Teams · Google Chat

PRIVACY AND CONTROL

Your video stays yours.

Camryx was built so a shop owner can switch it on without handing their whole recording to anyone.

Recordings stay on your recorder

Your full recording stays on your DVR or NVR. Camryx keeps only short event clips and snapshots.

Outbound only

The site agent connects out over HTTPS. No open ports. Live video is relayed only while someone is watching.

No face recognition

Camryx does not identify people and keeps no face templates.

Passwords encrypted

Camera passwords are stored with AES-256-GCM encryption.

Who sees what

Owner, Manager and Viewer roles per site, with an audit log of who did what.

Tools for India's DPDP Act

Set how long clips are kept, erase footage on request, and keep clips in an open case on hold.

Choose where the AI runs

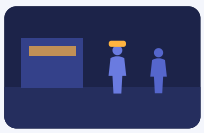

Camryx managed AI
Nothing to set up. You can pick AI that stays in India.

Your own AI provider
Use your own keys for OpenAI, Gemini, Claude or a local Ollama model.

Camryx Local
The desktop edition runs the AI on your own PC, offline.

WHO IT IS FOR

For places with cameras and no one free to watch them.

Shops and showrooms	“Who took the box from the counter yesterday?”	
Branches and chains	Opening and closing times for every branch, in one morning report.	
Warehouses	“Tell me if the loading bay is open after 8 PM.”	
Factories	“If anyone in the work area isn't wearing a helmet, tell me.”	
Schools and offices	“Was anyone in the store room after 8 PM?”	

Live view
All cameras in one grid, with pan, tilt, zoom and talk-back on cameras that support it.

Team access
Owner, Manager and Viewer roles, per site, with an audit log.

Number plates
Off by default. Switch it on for gates and parking, with block, staff and VIP lists.

API and webhooks
Scoped API keys and signed webhooks to connect your own systems.

EARLY ACCESS IS OPEN

Stop watching. Start asking.

Tell us about your site and your cameras. The Cybs Innovations team will set Camryx up on your cameras with you.
